

RE: Clearflow Group Inc. Reference

To Whom It May Concern:

This letter is regards to Clearflow Group Inc. (Clearflow) as a supplier of wastewater chemicals and chemistry services to Kayden Industries LP. We currently use Clearflow from start to finish for all of our wastewater dredging and mechanical dewatering services. Clearflow delivers consistent and service in helping us choose the proper chemistry for each lagoon we service. They offer support throughout the project until successful completion. Without their chemistry expertise, I believe we would not achieve the successes we have to date.

The water lynx product is used on all of our large lagoon projects and consistently delivers clear water, and has proven to be more efficient and effective than our previous supplier. Clearflow will continue to work with us on all lagoon projects and is assisting us currently on a large wastewater job in Alberta, Canada. We've also used their products and services on our lagoon projects in the USA, and we will continue to work with them for the foreseeable future.
